

ECORESURS GROUP LTD

Registered in 2005

Country of registration: Ukraine

Corporate ID: 33428638

HQ \ Production Unit location: Kropivnitskiy

(Kirovograd) city, Ukraine

14 employees

Current activity: Processing of PET waste into PET flakes.

Interested in cooperation: JV production of POY multifilament yarn.

We process waste PET (pressed in bales of bottles of water, juice, beer and other beverages) into PET flakes.

PET flakes are widely used in the production of various products.

The production capacity of our plant is 10,200 MT of PET flakes annually.

Our target markets are Ukraine, CIS and EU countries.

OUR PRODUCTION SITE

The production unit as well as our head office are located in the same place in Kropivnitskiy (Kirovograd) city.

The total area of the plant is 1.47 hectares.
The current buildings footprint is 3,800 sq. m.

The capacity of existing equipment is 10,200 MT of PET flakes per year.

We have all possibilities for expansion.

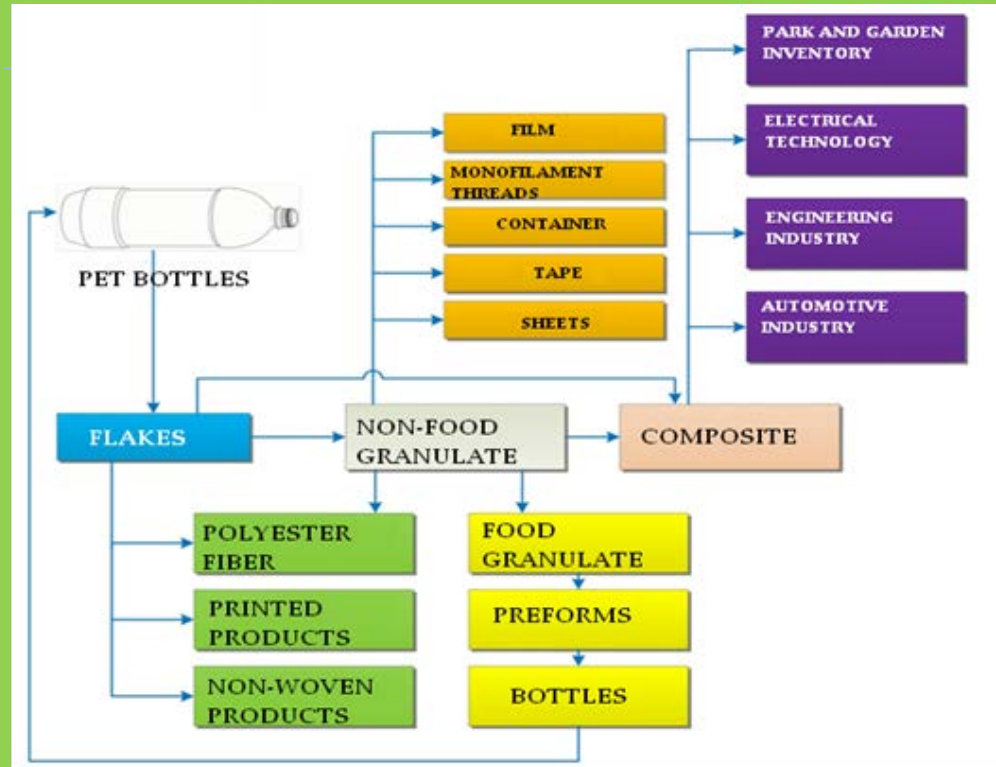

WE ARE LOOKING FOR JV PARTNERS

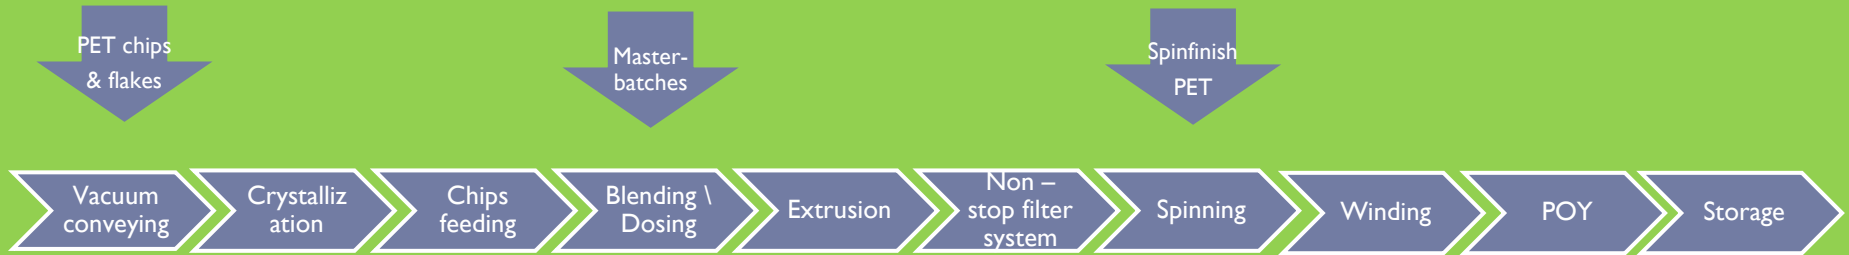

The main idea is adding production of PET multifilament POY yarn denier range 100-300 den final into our plant's production program.

POY multifilament yarn is used in the production of textile yarn, high tenacity yarns.

MORE ADDED VALUE IN FINAL PRODUCTS = MORE PROFITS

We are interested in JV partners who can assist us in establishment of the following specialized POY multifilament yarn production line.

ECORESOURS GROUP LTD is ready to provide the JV with personnel, raw materials, necessary land, industrial buildings connected to communications, warehouses, part of finances needed.

According to our assessment, there are large markets for our traditional products like PET flakes as well as PET POY multifilament yarn in Ukraine, CIS and EU.

THANK YOU VERY MUCH FOR YOUR ATTENTION!

WE INVITE YOU FOR JV COOPERATION!
