# **E-VISITORS SYSTEM**

## **INTRODUCTION**

E-Visitors is project which come as a solution for registration, it is no longer needed to spend your time on gates for manual registrations, you have no longer to fear about the loss of national ID or taking tours going and back for picking it in use, because with E-Visitors you are receiving a package that will help you to register, it is fast and fair. You know what else!?! Now your equipment will be registered too and you will pass anywhere for leaving the place, because the system have a single server.This will help in entry and exit attendance of visitors /clients with entry equipment's.

## **BACKGROUND OF PROJECT**

With the outbreak of COVID-19, the SAN TECH LTD wanted to use their skills to support the community through the pandemic. SAN TECH LTD noticed that many people still often use physical registration (writing using a pen and paper) when checking into hotels or signing up for goods and services. We up with a plan to remove physical touch points for consumers in order to limit the spread of the virus from person to person. San Tech has recently launched its prototype software, which scans identity cards and barcodes that can be used by hotels, libraries, institutions, bars and other customer-facing organizations.

## **WHY THIS SOFTWARE IS USEFUL IN SOCIETY?**

Improving the quality of services, reducing the spread of covid-19 through smart technologies, saving society's time and money, are our purpose, target and focus. We chose to provide for you a system that securely keep your data in a way you will no longer be stressed of thinking about lost information, in a way that you will no longer take too much time to search for the reports hold in books, we prepared a system that may help any institution for improving also the customer care services by saving clients' money and time and even bringing confidentiality and conflict solution.

E-Visitors as a product of SAN Tech Ltd, is a technology that can solve your issues and you remain thankful for the service, even your customers remain thankful for your services.

## SYSTEM IMPLEMENTATION AND USAGE:

By now we have ended a device which accept scanning Identification card of both visitors and staffs. This device connected using cable and we are proceeding on working for portable device as next version of project .

E-visitors system is the system that helps the con

Activate Windows  
Go to Settings to activate Windows.

## **ABOUT ADVERTISEMENT:**

You have been spending too much time searching for the information about arrived or left visitors (clients) due to a registration done in books and papers!!!?

**You have insecurities that your registration system may be one of ways that easily spread the covid-19 pandemic!!!?**

Had your security guards ever lost the visitors or clients identities due to the big number of visitors!!!? Have you ever lost information kept in book or papers used on gates or holding stock information due to not recognizing the date or the book that you have used while recording!!!?

**Do you need to find a solution of a good manner of controlling your stock?**

SAN Tech Ltd has brought for you a software with smart technology, that help you to only use the national IDs or the barcodes found on your products or your customers equipment , for you to manage all that in an easy, fast and smart way.

## **OUR PARTNERS AND CLIENTS APPROACH**

Collaboration and strategic partnerships are fundamental to improving business outcomes. Once you've decided on the type of help your startup needs, you can start looking for the right partners and Make the Brands of Your projects. Most of the times we use E-visitors during automated

records of all entries and exit in office of SAN TECH LTD. The following are clients we are approaching and users of system.
