ORGANIC POWDER DATES

Date powder is a range of gourmet products made from our date fruits' sectors but which have been discarded during the sorting out phase (too big, too small, scratched...). This new range has, therefore, been designed to give these delicious fruits a second chance and thus avoid waste while reducing our ecological footprint.

It is also a further step in our solidarity commitment with our partner producers since it allows us to multiply their outlets and therefore their income.

Our chain of Tunisian organic dates, located in the oases of Hazoua, Rjim Maatoug and ELfaouar, offers us particularly honeyed and aromatic dates. Obtained from Deglet variety dates Nour, tasty and fragrant, which are simply dehydrated and then crushed, date paste is naturally sweet, nutritious and rich in fiber.

The salt content, in this category, is only due to naturally occurring sodium

To have date powder, dates are dehydrated and finely crushed. It is a natural and nutritious sweetener and a perfect substitute for refined sugar. The powder is used in confectionery, baked goods and dairy products-cereal growers.

The powder comes from dried and crushed dates, finely compressed to make flour. For soft and natural touch, you can add date powder to your mixtures, pastries, mixed drinks such as smoothies, fruit juices, on yogurt, with oats and more. In many countries, date powder is used to sweeten desserts and drinks.

INGREDIENTS

Product from organic farming

Ingredient from fair trade and controlled according to the Fairtrade standard

Origine : Tunisia

Net weight : 250g, 400g, 500g, 3kg, 5kg, 10kg, 20 and 25kg

Packaging : sachets, Doypack

USE OF DATE POWDER

Date powder can also be used for fermentation (citric acid, vinegar, yeast, alcohol), refreshing beverages with flavored dates, juice, confectionery and pastries. The powder is excellent for health because it contains fructose, dextrose, sucrose and maltose. Not to mention carbohydrates which are a true source of energy for the body while helping to fight arterial high blood pressure as it is not containing fat.

For industry food, date powder is an ingredient very healthy for confectionery, chocolate, protein bars, pastries, beverages alcoholic beverages, baby food, dairy products dairy and ice cream. Date powder is preserved to make a sweetener exceptional, she is also rich in potassium, magnesium, copper and a excellent source of iron, calcium, phosphorus, niacin and pyridoxine.

In addition, date powder contains powerful antioxidant effects and plenty of beta-carotene, lutein, and zeaxanthin, which protect eyes. The powder has the highest content in antioxidants compared to honey and syrup of maple.

ORGANIC CHOPPED DATES

Dates cut into pieces are a range of gluttonous products. They are derived from the dates cultivated in our date sectors, but which have been discarded during the sorting out phase (too big, too small, scratched, etc.). Therefore, this new range has been designed to give these delicious fruits a second chance and, thus, avoid waste while reducing our ecological footprint.

It is also a further step in our solidarity commitment with our partner producers since it allows us to multiply their outlets and, therefore, their income.

The Deglet Nour variety offers very good chopped dates, notably thanks to the specific perfume of this variety that is strongly appreciated worldwide because of its soft and sweet taste. Chopped dates fit in, easily, in recipes for cakes, muffins, cakes, also bars protein. They, also, provide a wonderful sensation to eat, combining a unique sweet taste and a gummy texture.

Cut Dates are an excellent source of iron, which is responsible for oxygen transport in the blood. Additionally, cut dates are excellent sources of potassium. Indeed, potassium is an important component of cells and fluids that helps regulate the frequency of heart and blood arterial pressure. Diced dates are, also, rich in minerals, essential for the development of bones, teeth and strongly required for muscle contraction, blood clotting, and nervous impulse conduction.

ORGANIC DATE PASTE

Date paste from Bioorigin Fruits is produced from Deglet Nour Dates from Tunisia. Produced from antiquity by date producing countries, date paste is as old as the culture of the date palm in these countries. The process of obtaining date paste is, simply, made by selecting soft dates, sometimes pitted by hand, and crushing them. So, we get a marvel of flavors, that is the date paste.

Moreover, just like the fruit from which it is derived, date paste is very rich in alimentary fibers, with protective and regulating properties for our organism.

The existing antioxidants are also abundant and perfect for our body thanks to their ability to protect our cells. Carbohydrates in date paste, also, allow you to refuel your energy! Additionally, it contains vitamin C and vitamin D: which are good for the skin. Indeed, these vitamins help in regenerating a better skin and, thus, a better elasticity. Date paste helps fight anemia and general fatigue thanks to its richness in Iron.

Finally, magnesium, salts minerals and manganese are here in the date paste. They are excellent for strengthening bone health and preventing depression. From this fact, this dough contains all those benefits, add to the fact that it is an alternative to sugar for your favorite recipes.

This dough will turn out to be your better friend to change traditional sugar and find another source of pleasure and well-being. Date paste makes excellent sweet desserts. In fact, incorporating it in a recipe, it is the final touch of flavors in adding a hint of sweet flavor.

ORGANIC DATES SYRUP

Date syrup or concentrated date juice is obtained by a diffusion process principle, a 100 % natural and environmentally friendly method. The obtained juice is then concentrated and strongly filtered ending into a Brown colored syrup preserving the virtues of the Deglet Nour date.

The syrup is made from fresh dates, first, cooked in the water and, then, filtered to remove the pits. They are then pressed to extract a juice. This juice is, later on, concentrated by cooking it over a low heat until having a colorful liquid and spirits. It is the famous date syrup. Moreover, with its notes of caramel and its richness in minerals, date syrup attracts lovers of healthy and gourmet cuisine at the same time. In fact, syrup has many benefits for those who consume it. Such as minerals (calcium, magnesium, sodium, copper, etc.), as well as vitamins A, B1, B2 and C, which are ideal for the body. Date syrup contains less white sucrose compared with sugar. Therefore, date syrup is a good and healthy alternative in the kitchen. The syrup is ideal for garnishing desserts because it brings both softness, color and flavor.
