About us

Over 10 years of experiments, trials and research, Soil Bio-Muti has finally been developed into a solution that is good for all plants and animals and CANNOT be used together with any chemical treatment. It is a natural solution and contains a multitude of natural microbes.

A Safe Product

Soil Bio-Muti is completely safe to use because it is completely natural. It cannot be overdosed – the more the better.

NO MORE COMPOST MAKING:

Save TIME and EFFORT, by incorporating organic matter along with the microbes straight into the bed, pot or area and water well.

You will have less weeds and healthier plants!!

PLANTS: Develop a healthy root system, increase absorption of all nutrients, improve immunity to diseases and pests, extend the blooming time.

VEGETABLES: Tastier, healthier and larger vegetables, that stay fresher for longer.

FRUIT TREES: Better quality fruits with less pests and diseases, longer shelf life.

CYCADS: Increase leave structure and better cone development.
