

 ICC Ukraine presents

IT-Match Ukraine-Europe

A programme that will help establish business cooperation
between Ukrainian IT companies and European customers
interested in digital services

In order to support the development of the Ukrainian IT industry, ICC Ukraine appeals to its European colleagues and partners to support in the implementation of the Programme

HOW DOES IT WORK?

- 01 We receive requests from IT companies from Ukraine that want to find customers in the EU
- 02 We select companies based on clear criteria
([experience and portfolio](#), [customer feedback](#), [innovative solutions](#), [social responsibility](#))
- 03 We contact European partners and businesses that are interested in digital services and provide a portfolio of potential contractors
- 04 We organise online interviews in the format of customer/performer

We believe that our initiative will help develop the IT industry in Ukraine and establish new business partnerships

[Join us!](#)

*The following pages contain current portfolios of Ukrainian companies interested in cooperation with European customers
