

DEVLIGENCE LIMITED

COMPANY PROFILE

Introduction

Devligence is a software engineering and product innovation company that specializes in creating intelligent, custom software solutions for businesses.

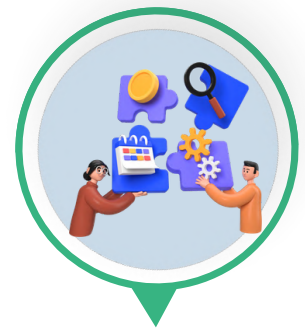

We blend cutting-edge AI technology with strategic insight to deliver products that not only address today's real-world challenges but anticipate tomorrow's opportunities and drive measurable value.

Our team includes managers, strategists, developers, designers and sales all with a united focus and passion for technology and a commitment to excellence.

At Devligence, we believe in true collaboration powered by intelligence. We transform ideas into impactful, AI-enhanced solutions through knowledge sharing, innovation, research, and strategic collaborations.

Our Products

BoardHub is a comprehensive and secure AI-powered meeting management solution designed to help organizations streamline and improve the way they manage meetings and collaborate with board and committee members. BoardHub combines enterprise-grade security with cutting-edge AI to transform board governance and organizational collaboration.

EventAccumen is a comprehensive toolkit designed to empower event organizers, planners, coordinators and organizations with intelligent tools for attendee registration, seamless check-ins, and advanced analytics powered by machine learning insights.

Our Products

GRChub is an AI-powered governance, risk, and compliance platform that enables organizations to proactively identify, assess, and mitigate risks while ensuring regulatory adherence through intelligent automation and predictive analytics.

® Qualiverify is an AI-powered credential verification system that enables seamless, bi-directional verification between employers and educational institutions to authenticate employee academic credentials with unprecedented speed and accuracy.
