Organization of Our Work

• Production

25 years of experience with selected raw materials and controlled storage and production technology allow us to obtain products of consistently high quality

• Storage

Our own certified facilities:

- organic grain storage facility with a total capacity of 4,400 tons for storing organic raw materials;
- grain storage facility with a capacity of 4,000 tons for traditional raw materials;
- finished product warehouse with an area of 2,000 square meters for finished products, including temperature-controlled storage.

• Quality

Quality control is carried out at every stage of storage and production by our own certified laboratory. Our production processes comply with HACCP principles, ISO 22000 standards, and international food safety standards. This guarantees a consistently high level of product safety and quality.

Product Usage

HULLED MILLET

- Intended for preparing porridges and side dishes.
- Used in recipes for gluten-free flours.
- Often added to bread-making flours.

HULLED MILLET (HYDROTHERMAL TREATED)

- Extruded breakfast cereals and bars.
- Baby cereals and dry mixes.
- Dietary and sports products (energy bars, protein mixes).
- Yeast-free and quick baking products.

WAXY HULLED MILLET

- Suitable for grain porridges, dense-textured desserts, and cereal-based products.
- Traditionally used in selected regional Asian applications.

Applicable in gluten-free baking systems and clean-label thickening solutions.

CO2 Extracts of Millet and Amaranth Seeds

Raw materials:

- Millet (*Panicum miliaceum* L.) - rich in linoleic acid, miliacin, vitamin E, and phytosterols
- Amaranth (*Amaranthus caudatus* L.) - a natural source of squalene, omega-3/6, tocotrienols, and antioxidants

Extraction Technology:

- Methods: Supercritical CO2 extraction (solvent-free, gentle on heat-sensitive compounds)
- Advantages: High purity, preservation of bioactivity, sustainable and eco-friendly process
- Equipment: Careddi CTH-20 (2 × 10 L vessels), optimized for small-seed biomass

Packaging options:

- 10–100 ml (sample)
- 1–10 l
- 20 l (industrial supply, airtight containers)

The Pure Power of Plants for Cosmetics, Nutraceuticals, and Pharmaceuticals

Extract profile:

lipid-rich fractions with a high concentration of functional bioactive substances

Applications:

- natural cosmetics (skin care, scalp care, anti-aging products)
- nutraceuticals
- (antioxidants, regenerative support) functional
- pharmaceutical and dermatological preparations

Cold-pressed Oil

Raw materials:

Flax seeds Hemp seeds
Pumpkin seeds Amaranth seeds

Useful properties

Supports the immune system and lowers cholesterol levels, improves digestion and intestinal function, has anti-inflammatory and antioxidant effects, and is a source of beneficial vitamins and minerals. Rich and natural taste and aroma.

Production technology

- Method: Use of FloraPower screw presses
- Advantages: Temperature does not exceed 40°C-bioactive substances are fully preserved
- Storage in airtight containers with limited oxygen access
- Equipment: FloraPower (German manufacturer of high-tech pressing and extraction equipment specializing in cold pressing of oils)

Genuine. Vibrant. Beneficial.

Uses of cold-pressed oils:

- Use in dietary nutrition
- Add to salads, porridge, smoothies
- Baking and frying
- Internal use
- Use in cosmetic products for skin and hair care

Packaging options:

- 10–100 ml (sample)
- 1 l–10 l (bottles, canisters)
- 20 l canisters (industrial volumes)

Our Own Certified Laboratory

Quality is controlled by our own certified laboratory and verified by external independent accredited laboratories. The absence of gluten residues is controlled using specialized BIOTEK ELX-800 equipment manufactured in the USA. We regularly test raw materials for pests, mycotoxins, and other indicators, which allows us to quickly identify and eliminate any potential risks.

Production. Packaging.

25 years of experience in raw material procurement, qualified personnel, and proven production technologies enable us to achieve consistently high product quality. Production facilities are certified according to the FSSC 22000 standard (which complies with GFSI). The production lines are equipped with mineral impurity separators, Buhler Sortex optical sorters, metal detectors (Sartorius), and automatic dispensers.

Product Storage

Agrofirma Pole has its own certified organic grain storage facility with a total capacity of 4,400 tons for storing organic raw materials, a grain storage facility with a capacity of 4,000 tons for conventional raw materials, and a finished product warehouse with an area of 2,000 square meters for finished products, including storage with controlled temperature conditions.

- **Quality assurance**

Thanks to advanced technologies and strict quality control, we guarantee the highest standard of stored raw materials. This is confirmed by the relevant certificates.

- **Transparency of the process**

We provide our partners with full access to records of storage conditions and quality control results, ensuring confidence and trust in our cooperation.

Integrated security systems

We have implemented automated monitoring and alarm systems that allow us to respond in real time to any deviations from optimal storage conditions.

Product Storage

Agrofirma Pole ensures the storage of agricultural products in accordance with international standards

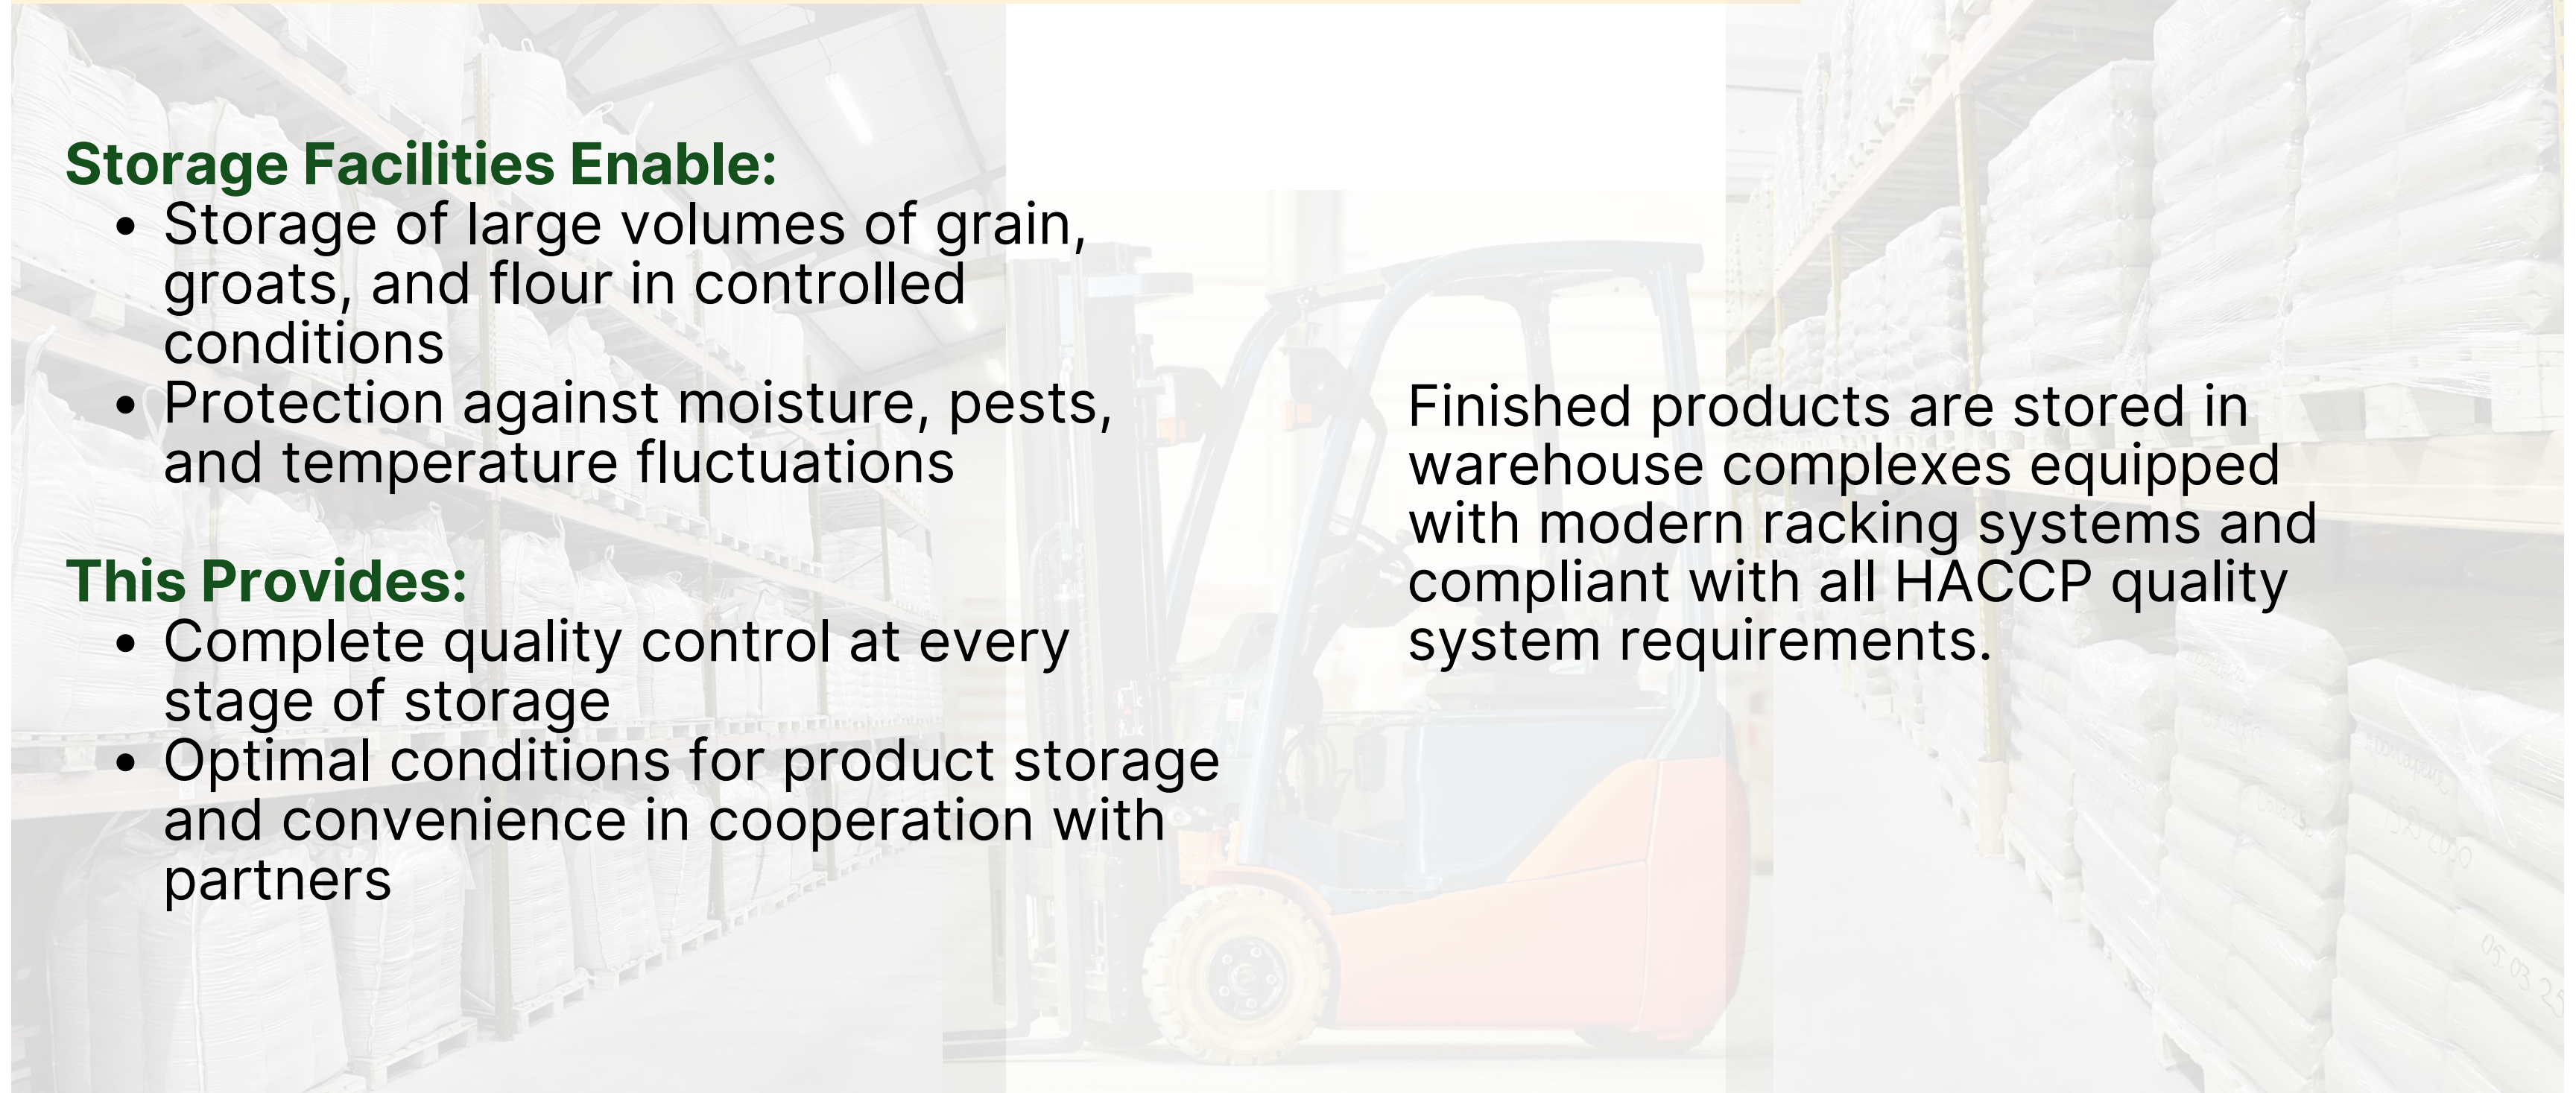

Storage Facilities Enable:

- Storage of large volumes of grain, groats, and flour in controlled conditions
- Protection against moisture, pests, and temperature fluctuations

This Provides:

- Complete quality control at every stage of storage
- Optimal conditions for product storage and convenience in cooperation with partners

Finished products are stored in warehouse complexes equipped with modern racking systems and compliant with all HACCP quality system requirements.

Logistics Capabilities

We operate our own fleet for international road freight transport across the EU and the UK:

7 trucks with curtain-side trailers (23 tons)

– ideal for bags, big bags, and palletized cargo

6 trucks with tipper grain carriers

– suitable for bulk transport of grain, feed, and processed agricultural goods

As of January 1, 2025, we hold a license for operating EU/UK - UK/EU trade routes

We offer:

- Fast and reliable delivery
- Full cargo control
- Direct service without intermediaries

Ivan Tomenko

Founder of Agrofirma Pole

Our company, adhering to the principles of the European community, is committed to integrating Ukraine into a unified European space with shared human values, including:

- The concept of "sustainable development" of territories for comfortable living.
- Principles of fair trade.
- Mutually beneficial cooperation with farmers, supporting organic farming and biodiversity.
- Building long-term and reliable relationships with our international partners.
- Trust and integrity among all participants in the organic market.
- High social standards for employees.

CERTIFICATIONS

The presence of necessary conformity certificates confirms our status as a reliable partner.

UA-BIO-108
Agriculture of Ukraine

EU Organic
This is the official organic certification mark of the European Union. The presence of this certificate confirms that the product is made without synthetic pesticides, fertilizers, or GMOs. It guarantees consumers high quality and safety of organic origin, while also opening the EU market for export.

FSSC 22000 v.6
An international certification for food safety management systems. It confirms that modern safety standards, recognized by global corporations and retailers, have been implemented in production.

FDA Registered Facility - registration with the U.S. Food and Drug Administration (FDA) for export to the U.S. market

Canada Organic / Biologique Canada
National organic certification for the Canadian market. Indicates full compliance with the requirements of the Canadian Food Inspection Agency (CFIA). Grants the right to label products as "organic" in Canada.

Kosher Certificate
Confirms that our products comply with the rules established by Jewish law.
